EDUCATION

- **Birla Institute of Technology, Mesra** 2025-27
Master of Computer Application(M.C.A.) Current CGPA: 8.70
- **St. Xavier's College of Management & Technology, Patna** 2022-25
Bachelor of Computer Application(B.C.A.) CGPA: 9.14

EXPERIENCE

- **Bharat Intern** September 2023 - October 2023
 - Contributed to the development of responsive web applications using HTML, CSS, JavaScript, and React, translating UI requirements into functional, cross-browser-compatible interfaces. Built reusable components and interactive features to improve usability and layout consistency across devices. Collaborated in a remote team environment, applying best practices in code organization and version control (Git), while gaining hands-on exposure to modern frontend development workflows.

PERSONAL PROJECTS

- **Adaptive RAG AI Assistant** July 2026
Language/Technology: Python, LangGraph, RAG, Groq/Llama, Qdrant, MongoDB
 - Built an AI assistant using LangGraph that dynamically routes queries between LLM responses, document retrieval, and web search. Implemented query rewriting, relevance grading, and vector-based retrieval with Qdrant, plus MongoDB-backed conversational memory to improve response accuracy and context retention.[Live Demo](#) | [GitHub](#)
- **Audio Transcriber & Summarizer** June 2026
Language/Technology: React.js, Spring Boot, Spring AI, Groq Whisper API, Groq LLM, REST API
 - Built a full-stack AI application that transcribes audio into accurate text and generates concise summaries in real time, leveraging Groq's Whisper API and LLM for high-speed inference. Architected the backend with Spring Boot and Spring AI to handle multiple audio formats and REST-based processing pipelines. Designed a responsive, user-friendly React interface that ensures smooth performance across devices.[Live Demo](#) | [GitHub](#)
- **Question Paper Generation System - AI-Powered (Academic Project)** Jan 2025- Mar 2025
Languages/Technologies: React.js, Python (Flask), Groq API, DOCX Generation
 - A web-based AI-driven system that automates structured question paper generation across semesters and subjects. Faculty upload topic-wise data via Excel, and the system uses the Groq API to categorize questions and generate unique sets automatically. Built with React and Python (Flask), it delivers a clean, guided interface with downloadable DOCX output.[Live Demo](#) | [GitHub](#)
- **Mobile Sales Analytics Dashboard – Power BI** December 2025
Language/Technology: Power BI, DAX, Power Query, Data Visualization
 - Built an interactive Power BI dashboard to analyze mobile sales across India, delivering insights on brand performance, city-wise revenue, monthly trends, customer ratings, and payment methods using dynamic KPIs, slicers, and drill-down visuals.[GitHub Link](#) - Dashboard

TECHNICAL SKILLS AND INTERESTS

Languages: Java, Python, JavaScript

Backend: Spring Boot, Spring AI, Spring Data JPA, REST APIs

Frontend: React, HTML, CSS, Bootstrap

Databases: PostgreSQL, MySQL

GenAI: LangChain, LangGraph, Agentic AI, RAG, LLM APIs

Cloud: AWS

Tools: Git, GitHub

Data & BI: Power BI, DAX, Power Query

Relevant Coursework: Database Management System, Operating Systems, Object Oriented Programming

ACHIEVEMENTS AND CERTIFICATIONS

- Won multiple college-level coding competitions.
- Solved 300+ Data Structures & Algorithms problems on LeetCode
- Certification: Web Development Bootcamp – Udemy
